

Medical devices

Miltenyi Bioprocess provides GMP manufacturing and aseptic packaging of complex custom-made medical devices. Aseptic production of complex sterile tubing systems and bags for different applications based on our installed blow film technology gives to our customer a broad range of process development technologies and material testing opportunities. All process equipment is installed in a class D environment, upgradable to higher levels as well.

- Quality management in this area is certified to ISO 13485: 1996.
- We deliver your device with complete product documentation.
- Development, sample production, small series and the production of up to 20,000 pieces of complex disposables are possible.
- Sterilization process validation using ethylene oxide or gamma irradiation are standard methods in our facility.

Our in-house developed pump-cassette tubing system together with the parallel pump drive system, offers to our customers a new tool for different clinical and research applications.
