Relocation of storage and distribution site from Auburn, California to Gaithersburg, Maryland, USA

- All products of Miltenyi Biotec in scope -

Category of change: Relocation of distribution site

Current State: The US Headquarter of Miltenyi Biotec is situated in Auburn, California, USA. This site includes warehouses for distribution of all Miltenyi Biotec products, which are shipped from Miltenyi Biotec sites in Germany to the USA.

Planned change: Miltenyi Biotec transfers the logistics and distribution operations from Auburn, California to Gaithersburg, Maryland. After a longer transfer period, during which customers will be serviced from Auburn, CA and Gaithersburg, MD, in future it is envisioned that all products, with the exception of instruments, for the US market will be distributed via the site in Gaithersburg, Maryland. Instruments will continue to be distributed via the site in Auburn, California. The legal address of the Miltenyi Biotec Inc. is not affected by this change.

Justification/Evaluation: In order to meet the increasing market demand, Miltenyi Biotec has to expand the storage and logistic capacities in the USA.

All storage areas and areas of operation will be qualified and released according to applicable regulatory guidelines.

Standard Operating Procedures are established and will be followed for all storage and logistic activities. Same instructions and same materials will be used for the new site.

There is no change of raw material or manufacturing process. The impact of this relocation on the performance, quality and safety of the affected products is estimated as very low.

Estimated Implementation Q3/2021
