CliniMACS® CD3 Depletion System

CD3 Depletion

Effective CD3 T-cell depletion using the CliniMACS® System to produce peripheral blood progenitor cell products for haploidentical transplantation in 23 children and adults: the updated Lund experience.

Rapid and effective CD3 T-cell depletion with a magnetic cell sorting program to produce peripheral blood progenitor cell products for haploidentical transplantation in children and adults.

Rapid immune reconstitution after a reduced-intensity conditioning regimen and a CD3-depleted haploidentical stem cell graft for pediatric refractory hematological malignancies.

Mismatched family member donor transplantation for patients with refractory hematologic malignancies: Long-term follow-up of a prospective clinical trial.

Haploidentical transplantation for children with refractory hematologic malignancies.

A large-scale method for T cell depletion: towards graft engineering of mobilized peripheral blood stem cells.

Miltenyi Biotec provides products and services worldwide. Visit www.miltenyibiotech.com/local to find your nearest Miltenyi Biotec contact. The CliniMACS® System components: Reagents, Tubing Sets, Instruments, and PBS/EDTA Buffer are manufactured and controlled under an ISO 13485 certified quality system. In Europe, the CliniMACS System components are available as CE-marked medical devices. In the USA, the CliniMACS System components including the CliniMACS Reagents are available for use only under an approved Investigational New Drug (IND) application or Investigational Device Exemption (IDE). CliniMACS® MicroBeads are for research use only and not for use in humans. MACS and CliniMACS are registered trademarks or trademarks of Miltenyi Biotec GmbH. Copyright ©2011 Miltenyi Biotec GmbH.
